

# **EU-BON Biodiversity Portal**

**Content creation and integrating key datasets for  
policy, science and citizens**

Patricia Mergen, Royal Museum for  
Central Africa, Tervuren, Belgium

# Data Portal

## Challenge 1 :

- There are 10000 of data access points out there ?
- After EU-BON : Now we have 20000 data access points out there ? How to share and use this data ?

**How can EU-BON make the difference and avoid that this known scenario repeat itself ?**

# Data Portal

## Challenge 2 :

- **Tools/services *versus* Content ?**
  - **How to mobilise new content, curate and update existing content**
  - **Expectations of many users on content and how to find funding for digitalisation and adding content ?**
- Priority on gap analysis, but how depend on intended usage of the information ?**

## ***Outcomes of the Task force meeting in Trondheim, Norway (29-31st May 2013)***

### **Gap analysis on :**

- **Taxonomic coverage**
- **Geographic coverage**
- **Time coverage**

**check in GBIF records that have geographic coordinate, which have not and investigate why and compare with other big data holder (INSD, LTER, Data One ...)**

**Link and compare with genetic resources (, links with Smithsonian, New York, DNA bank data)**

**Other data sources : portals and services of JRC ISPRA :**

**<http://ies.jrc.ec.europa.eu/index.php?page=data-portals>**

**Use EBVs : Abundances of selected set of species, Distribution for representative species**

## Topics of the training programme (ideas)

- **Coordinate with related training activities in the domain : GEOBON, GBIF, other projects in Biodiversity Information broad sense ...**
- **Tools and software to be used to reach EU-BON's objectives**
- **How to get measurable elements out of these tools and available data**
- **Analyze the Aichi Target and their indicators → 'Trends'**
- **How to communicate and visualize the results for the target audiences, with special attention to policy makers needs and graphical representation of large datasets.**

**Thank you  
for your  
Attention !  
Any  
Questions ?**

**Acknowledgements :**

Thanks to all the staff members of the RMCA cybertaxonomy team and other collaborators. To the many project partners for their contribution and support in the various activities.
